EDUCATION

- **Chhatrapati Shahu Ji Maharaj University** Kanpur, India
Bachelor of Technology in Information Technology; Percentage: 78% Sept 2020 – June 2024
- **Kendriya Vidyalaya** Kanpur, India
Intermediate (Class XII), Science Stream; Percentage: 88% Year of Completion: 2019

EXPERIENCE

- **Accenture North America Virtual Experience (Forage)** Remote
Data Analyst – Social Buzz Project July 2024 – Aug 2024
 - **Data Cleaning & Processing:** Cleaned, validated, and processed 7 large datasets (100k+ records) using Python and SQL, reducing data inconsistencies by approximately 30% and preparing datasets for downstream analysis and dashboard reporting.
 - **EDA & Analysis:** Performed exploratory data analysis (EDA) on 7 datasets using Python and SQL, identifying engagement trends, content performance patterns, and key KPIs to support strategic decision-making.
 - **Dashboards & Visualization:** Designed and built 5+ interactive Power BI dashboards to visualize KPIs, trends, and performance metrics, reducing manual reporting effort by 40% and improving insight delivery speed.
 - **Data Pipelines & Reporting:** Mapped end-to-end data cleaning pipelines, SQL queries, and Power BI reporting workflows for 7 datasets, reducing reporting inconsistencies and rework during analysis cycles.
 - **Business Insights:** Generated actionable business insights using Python, SQL, and Power BI, supporting analysis of top 5 content categories and engagement trends for a mock IPO strategy.
- **MyDigitalHp IT Solutions Pvt. Ltd.** Noida
Python Developer Intern Jan 2024 – July 2024
 - **Automation & Scripting:** Implemented Python automation scripts to streamline repetitive tasks, reducing manual effort by 25–30% and improving overall workflow efficiency.
 - **Data Handling:** Utilized Pandas, NumPy, and SQL for data manipulation, preprocessing, and feature development across multiple backend modules and datasets.
 - **Collaboration:** Collaborated with 3–5 developers and stakeholders to debug issues, optimize code performance, and support multiple application enhancements across backend modules.

PROJECTS

- **Facial Recognition Attendance System:** Built an automated attendance system using Python and OpenCV with real-time face recognition, achieving 100% accuracy during controlled testing scenarios and reducing manual attendance effort by over 70%.
- **Laptop Price Predictor:** Created a machine learning model using Python and Scikit-learn to predict laptop prices based on 5+ technical specifications, performing data cleaning, feature engineering, and model evaluation.
- **Road Accident Interactive Dashboard:** Implemented an interactive Power BI dashboard analyzing 50k+ road accident records to identify high-risk zones, peak accident periods, and trend patterns using KPIs.

SKILLS

- **Languages:** Python, SQL, C
- **Tools:** Excel, Power BI, Pandas, NumPy, Matplotlib, Seaborn
- **Machine Learning:** Data preprocessing, Feature engineering, Model building
- **Version Control:** Git, GitHub

CERTIFICATIONS

- Python for Machine Learning – Great Learning
- Data Analytics – Tutedude
- SQL for Data Science – SkillUp by Simplilearn
- Geoprocessing using Python – ISRO
